Animal and Poultry Nutrition

FEEDS AND RATION FORMULATION
PART II

Hassan M. Abdel-Hafeez

Prof. of Animal Nutrition

2019-2020

CONTENTS

Animal protein sources	75
Meat and fish byproducts	75
Meat byproducts	75
Processing of meat byproducts	75
Meat meal	76
Bone meal	76
Blood meal(dried blood)	77
Deleterious factors in meat products	77
Fish meal	78
Hydrolyzed feather meal, hair meal, and leather meal	81
Synthetic amino acids	82
Bypass, Escape, Nondegradable proteins	82
New and unconventional sources of protein	83
Milk and milk by-production	85
Forage	88
Legumes	88
Berseem	89
Kashrengaig or Lablab	89
Grasses	90
Green corn or Darawah	90
Sudan grass	90
Swamp barn-yard grass	90
Deccan grass	90
Bermuda grass	91
Silage	91
Coarse fodders or roughages	93
Straw or tibn	93
Lentils and bean hulls	94
Hay and hay making	94
Feeding standards and ration formulation	103
Feeding standards	103
Ration formulation	104
Mathematical methods used in ration formulation	107
1-The square method (Pearson square)	108
2-Trial and error method	108
3-Simultaneous method	108
4-The 2 x 2 matrix method	108
5-The computer method	108
Steps for ration formulation in animals	109
