

Course specification

Course Data

Course Code:	SUR: 5272
Course title :	Systematic surgery
Academic year:	5 th Academic year part II
Program title:	B. Sc. Veterinary Medical sciences
Contact hours/ week	4 hours/week, Lect.(2hrs/week), Practical(2hrs/week)
Approval Date	

1-Professional information

Overall aims of course:

This series of lectures and practical classes is designed to provide the clinical knowledge and practical skills in special veterinary surgery to provide the student with knowledge and skills that enables him/her to identify, analyze, manage and/or refer clinical surgical problems in order to provide efficient, cost effective and humane patient care.

This course aims to:

1. Introducing the academic background and practical experience about Special surgery.
2. Application of the basic principles learned in general surgery, diagnosis and therapy of surgical affections.

2- Intended learning outcomes of course (ILOs)

a- Knowledge and understanding:

By the end of this course the student should be able to:

- a1. Recall the basic principles of anesthetic techniques and materials.
- a2. Recall the basic steps needed for conduction of safe anesthesia.
- a3. Mention the basic principles of surgical interference.
- a4. Describe the causes, clinical features and diagnosis of different surgical conditions.
- a5. Mention the principles and practice of the preoperative preparation and postoperative care including pain management.
- a6. Recognize the common medical errors and malpractice in surgery.
- a7. Describe the surgical anatomy and physiology of the surgically important regions, organs and structures of the body.

b-Intellectual skills

By the end of this course the student should be able to:

- b1. Interpret patients' symptoms and physical signs to reach an accurate diagnosis.
- b2. Interpret and predict the prognosis and Sequelae of surgical affections.
- b3. Prioritize the appropriate investigations needed for patients with common and emergency surgical conditions.
- b4. Integrate the results of clinical and investigatory findings to formulate appropriate cost effective management plan for common surgical problems.

Course specification

c-Professional and practical skills

By the end of this course the student should be able to:

- c1. Obtain accurate and complete surgical history.
- c2. Examine the patient systematically as well as with proper note keeping
- c3. Identify normal surgical and topographic anatomy of different parts and systems of the body.
- C4. Identify the most significant clinical manifestations of common and emergency surgeries.
- C5. Recognize various features of surgical diseases in different body systems.

d- General and transferable skills

By the end of studying the course, the student should be able to:

- d1. Communicate
- d2. Utilize anesthesia as a necessary aiding tool with surgical interferences.
- d3. Able to diagnose and define surgical problems.

3-Topics and contents

Course	Topic	No. of hours	Lectures	Practical
Fifth year-second term Special surgery	-Eye affections	12	6	6
	-Cranial Sinuses affections	4	2	2
	-Ear and horn affections, back and tail affections	4	2	2
	-Teeth affections	4	2	2
	-Digestive system affections	12	6	6
	-Urinary system affections Including new surgical techniques recorded for surgery department, Fac. Vet. Med., Beni-Suef University	4	2	2
	-Genital system affections	4	2	2
	-Hernia and abdominal muscles affections	4	2	2
	-Udder and t eat affections	4	2	2
	Total		52	26

4-Teaching and learning methods

- 4.1- Lectures (brain storming, discussion) using board, data shows
- 4.2- Self learning by preparing essays and presentations (computer researches and faculty library)
- 4.3- Practical sections and summer training.
- 4.4- Classes of cases admitted to the department with active participation of students.

Course specification

4.5 Attendance of operations in surgery hall.

5-Teaching and learning methods for the students with disabilities

Office hours and special meeting

6-Student assessment

6.1. Assessments methods:

Method	Matrix alignment of the measured ILOs/ Assessments methods			
	K&U	I.S	P&P.S	G.S
Final Exam	a1, a2, a3, a4, a4, a5, a6, a7	b1		2.4.1
Practical Exam		b1, b2, b3	c1, c2, c3, c4, c5	d1
Oral Exam		b4,		d1, d2, d3, c5

6.2. Assessment schedules/semester:

Method	Week(s)
Practical exams	14 th week
Final exams	14 th week
Oral Exam	14 th week
Student activity	Along the year

6.3. Weight of assessments:

Assessment	Weight of assessment
Practical exams	20%
Student activity	10%
Final exams	50%
Oral Exam	%20
	100%

7- List of references

7.1. Essential books:

- Dollar's veterinary surgery. J.J. O'Connor. 1980
- Wright's veterinary anesthesia analgesia. L.W.Hall. 1971
- Radiology in veterinary orthopedics. Joe. P. Morgan. 1972
- Veterinary anaesthesia. L.W.Hall. K.W.Clarke 1983

*These books are found in the library of faculty of veterinary medicine, Beni-suef University.

7.2. Recommended texts

Beni-Suef University
Faculty of Veterinary Medicine
Surg. Rad. & Aesthesiol. Depart.

جامعة بني سويف
كلية الطب البيطري
قسم الجراحة و التخدير والاشعه
